GRANTS: Upcoming Deadlines and Open Programs

The Chesapeake Bay Trust's grant-making strategies are shaped by three core objectives: environmental education, demonstration-based restoration, and community engagement. We look to these objectives as basic touchstones for developing our programs, engaging new partners, and communicating about our work.

Application **Extended** and now Due September 14, 2023 at 4 pm EDT [Nontidal Wetlands Award Program](#)

This program is a partnership between the Trust and the Maryland Department of the Environment to seek proposals for nontidal wetland projects in Maryland. This program provides funding to implement cost-effective wetland projects to provide valuable wetland functions, including habitat for a wide range of species and improved water quality, flood attenuation, recharge of groundwater, and aesthetics in the State's local watersheds and ultimately the Chesapeake Bay, Youghiogheny River, and Atlantic Coastal Bays.

Rolling Deadlines

[Anne Arundel Community Tree Planting Mini Grant](#)

The Anne Arundel County Community Tree Planting Mini Grant Program is a partnership between the Anne Arundel County Forestry Board and the Chesapeake Bay Trust to provide small community-based grants to help communities and organizations increase the number

trees and tree canopy in neighborhoods, parks, and communities. This program only funds within Anne Arundel County.

Charles County Forestry

The Charles County Forestry Grant Program is a partnership between the Charles County Government and the Chesapeake Bay Trust that aims to fund cost-effective reforestation projects in the County to increase tree canopy and as a result create forest habitat and improve water quality in the county's local watersheds and ultimately the Chesapeake Bay.

Community Engagement and Restoration Mini Grant

The Community Engagement and Restoration Mini Grant Program is designed to engage Maryland residents in activities that enhance communities, engage residents, and improve natural resources. This program funds small-scale activities such as tree plantings, rain gardens, stream cleanups, and storm drain stenciling, among others.

Prince George's County Rain Check Rebate

The Prince George's County Rain Check Rebate Program offers rebate incentives to homeowners, businesses, and others to install practices that will improve stormwater runoff quality, reduce pollution, and improve local stream and river health. Seven types of stormwater practices are eligible for rebates: rain barrels, cisterns, rain gardens, urban tree canopy, pavement removal, permeable pavement, and green roofs.

Urban Trees Mini Grant Program

The Urban Trees Mini Grant Program is designed to support non-profit organizations such as faith-based institutions, community and homeowners associations; service, youth, and civic groups by providing funding of up to \$5,000 for small native tree planting (15 trees or less) implementation projects.

GRANTEE NEWS

Maryland Department of the Environment (MDE) Nontidal Wetlands Award Program

To support no net loss of nontidal wetland acreage and functions in the state of Maryland.

Application Due Date Extended to:
Thursday, September 14th, 2023
at 4:00PM EST

Maryland Department of the Environment Nontidal Wetlands Award Program

The Maryland Department of the Environment and the Chesapeake Bay Trust seek proposals for nontidal wetland projects in Maryland. This program seeks to implement cost-effective wetland projects to provide valuable wetland functions, including habitat for a wide range of species, flood attenuation, recharge of groundwater, and aesthetics in the State's local watersheds. For more information, contact [Sarah Koser](#) or [Sadie Drescher](#).

[**Click Here to Start a New Application**](#)

Outreach and Restoration Grant Program

The Chesapeake Bay Trust seeks proposals for outreach and restoration projects. This grant program encourages outreach, community engagement activities, and on-the-ground restoration projects that increase knowledge, change behavior, accelerate stewardship of natural resources, and advance community and environmental health. For more information, contact [Danielle Hamilton.](#)

[Click Here to Start a New Application](#)

The Outreach and Restoration Grant Program IS NOW OPEN!

Deadline is Thursday August 3rd at 4pm EDT

Contact Danielle Hamilton at dhamilton@cbtrust.org

[Click Here to Register for the Virtual Information Session on May 31st from 11am-12pm](#)

--- OTHER OPPORTUNITIES ---

These opportunities are not funded by the Trust

Anacostia Watershed Society

Watershed Stewards Academy

The Watershed Stewards Academy equips and supports community leaders to recognize and address local pollution problems in their nearby streams and rivers. WSA provides community leaders with the tools and resources they need to bring solutions to these problems, restoring their local waterways and the communities they affect.

Participants become Master Watershed Stewards when they complete the coursework and an approved capstone project.

For more information, contact [Ariel Trahan](#).

Are you ready to become a stormwater leader in your community?

Watershed Stewards Academy

- Get the skills you need to solve pollution problems in your neighborhood creeks and streams
- Gain expertise in stormwater issues
- Cultivate a network of others who share your passion
- Complete a capstone project within the year, making you a certified Master Steward

30+ hours of virtual & in-person training * Offered twice a year in both Spring and Fall * Field work and experiential classes

Now Recruiting for Spring 2023 Classes

Classes run from Apr 12 - May 31
Combination of virtual and in-person field experiences at sites throughout the watershed

Applications are open until class is full.
Tuition is \$100, with scholarships available.

--- APRIL PROJECT HIGHLIGHT ---

Green Living:

Condominium Conservation Craze!

Through the Trust's [Montgomery County Watershed Restoration and Outreach Grant Program](#), Friends of Sligo Creek has installed a bioretention facility and a new rain garden

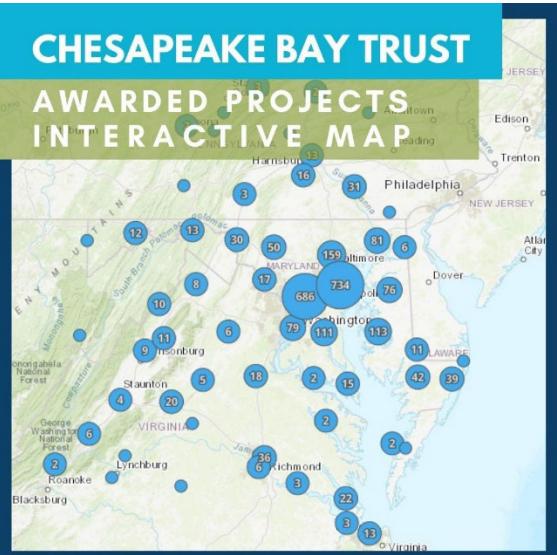

for the Carolyn Condominium community. By filling in salt resistant plants and mulch, they were able to develop a demonstration conservation landscape that will hold soil, capture salt runoff, and stabilize the entire project. In collaboration with the Carolyn Condominium community, Friends of Sligo Creek has help residents gain an understanding of the importance of proper stormwater management and develop an enthusiasm for environmental conservation. This project was supported in partnership with Montgomery County.

Showcasing YOUR Projects on the -- Chesapeake Bay Trust Awarded Projects Map -

Our interactive map currently displays over 3,000 awards throughout the watersheds of the Chesapeake Bay, Maryland Coastal Bays, and Youghiogheny River. Updated annually, the map allows you to search projects by area, funding partner, and/or environmental topic. Find projects in your community and see what's happening across the region!

NEW Resource - To Estimate Pollutant Load Reductions -

Green Stormwater Infrastructure siMple Pollutant Load reduction Estimator (Green-SIMPLE)

Intended Use

The Green Stormwater Infrastructure siMple Pollutant Load reduction Estimator ("Tool") was developed to help Chesapeake Bay communities more easily and consistently estimate the water quality benefits of proposed stormwater retrofit and restoration projects. The specific audience for the tool include local governments, non-profit organizations, neighborhood community associations, consultants, state agencies, universities and others conducting planning and implementation of stormwater retrofits in the Chesapeake Bay watershed.

The tool is an easy-to-use spreadsheet that is consistent with the pollutant loading rates and load reduction efficiencies used in the Chesapeake Bay Model. It allows users to estimate pollutant load reductions from individual projects as well as to compare a suite of candidate projects based on factors such as cost-effectiveness, pollutant reduction, maintenance burden, and constructability. The multi-link components can assist with watershed restoration planning and implementation prioritization.

The tool is useful for local governments, non-profit organizations and neighborhood community associations applying for stormwater retrofit implementation funding through the Green Streets, Green Jobs, Green Towns Grant Program or other programs by providing a simple option for users to estimate the water quality benefits of their proposed projects, and providing a consistent set of project metrics (e.g., lbs of nitrogen reduced) that funders can use to help inform decision-making.

While the tool provides a simpler alternative to more complex tools such as the Chesapeake Assessment and Scenario Tool (CAST) or field test, it is not intended to replace on-the-ground field assessment to evaluate potential locations for stormwater retrofits or development of concepts for candidate sites by qualified individuals.

Credits

This tool was developed by Amanda Pollock, PE, Karen Cappella, Jordan Cox, Dale Corato, PE, and Greg Hoffmann, PE (Center for Watershed Protection, Inc.) with funding from the United States Environmental Protection Agency Region 3, Maryland Department of Natural Resources, and the Chesapeake Bay Trust.

--- BAY PLATE ---

More than just a License Plate!

Did you know that proceeds from the sale of Bay Tags are distributed to local community groups, schools, and non-profits? They fund tree planting, clean-ups, stormwater projects, environmental education programs, and other conservation and restoration programs! Bay Tags also come with great perks like prime parking, discounts at restaurants, merchandise and service discounts, car washes and so much more. Learn more [here!](#)

Let's Be Friends.

Like us on Facebook or follow us on Instagram for current Trust happenings. We'll share project successes from grantees and ensure you're aware of the work being done by other local organizations and communities to restore and protect our natural resource treasures.

ABOUT THE TRUST

The Chesapeake Bay Trust shares a bold vision for a restored and protected Chesapeake Bay watershed and other natural resources in our area—from the Coastal Bays to the Chesapeake to the Youghiogheny River. We uniquely empower local community-based groups on the ground with the resources they need to take on a meaningful and measurable role in restoring forests, streams, rivers, bays, wildlife, and more in their own communities.

The Trust empowers these groups by providing grants and technical assistance. Every year, about 400 groups are awarded project money or provided other assistance to accomplish environmental education, community outreach, and local watershed restoration projects. Since 1985, the Trust has awarded \$140 million in grants and engaged hundreds of thousands of resident stewards in projects that have a measurable impact.

The Trust has received the highest rating from Charity Navigator for over two decades: on average 90 percent of the Trust's expenditures are directed to its restoration and education programs.
